# ANIMATION GETS REAL CAMP

WEDNESDAY- THURSDAY UPDATE

## ANIMATION IS UNDERWAY

Now that Ms. Dani has taught us all the basics, it's time for us to hit the ground running and get our creative juices flowing!

After reviewing what we learned on Monday and Tuesday, we broke off independently to continue working on our stories.

Wednesday we started experimenting with color, and began implementing it in our stories to liven up our animations. Today we continued to add details to our story such as creating a background!

# PUTTING IT ALL TOGETHER

On Wednesday, we continued to experiment with adding voice-overs and background sound bites to videos. We started with continuing to add to the *Toy Story 4* trailer we were previously working on in the beginning of the week, as well as a few commercials Mr. Clint showed us.

Today, we spent most of our time working on audio for our animated stories! We created our own tracks using Garage Band as background music for our story, and later Mr. Clint worked with each of us to help record sound bites and voice over dialogue for our animation.

*Looking forward to seeing you all at tomorrow's showcase!*
